September 30, 2004 letter

*Transcription, as best as can, of the letter received on September 30, 2004.*

Mary Ann Wright;

I am writing to a recent letter from Utah Division of Oil Gas and Mining. You asked for a map to scale of each of our mines. We have 4 mines and they are semi-developed. On Sept. 24 I had a man on our claims from Salt Lake. He is planning on coming back. I hope to leave him 2 of our mines. He has a rock bolt plant in Salt Lake and also Pennsylvania. So he is definitely a millionaire. I was surprised in that he had a lot of experience in under ground mines. He would probably do some surface drilling. Surface drilling causes very little surface disturbance drilling but would still be bonded. In your letter you wanted a map to scale of each mine. I tried to get my friend and partner also serves to prepare me some maps. Last Sat. the ambulance came and got him and took him to the Richfield Hospital. He has a liver problem. This summer I have seen him go down hill fast. He is 6 ft. 4 inches tall and must of weighed 235 lbs. He has no energy and is just able to get around. Also as the Terry must of lost 30 or 40 lbs this summer. Also it has affected his speech. He talks slower. Also I think it has affected his concentration and memory. Yesterday I went to the Richfield Hospital and Terry told me he hadn't finished any of the maps. Terry is either in his late 40's or early 50's. He and I have surveyed all of our claims. If he hadn't been sick he could of completed all 4 of my maps in a couple of days. If Terry doesn't get a liver transplant I think he will die this year. All of semi-developed and have great potential. Our mines are about 4-5 miles below the Gold Mountain Mining District. In the early 1930's at Kimberly the Annie Laurie-Bluebird Mine had a 75 ft. high grade quality fine that way mined on 4 levels down to the 600 ft. level. The Annie Laurie-Bluebird was No. 2 in the State of Utah. As far as myself, I am 78 years old and have a bad hip. Otherwise I would already have our mines in operation. Before we put any mine in operation we will contact you. All our mines have reclamation bonds. As I have no one to prepare the maps. I wouldn't be able to finish them.

Sincerely yours  
Lawrence W. Prisby
